International Business

Division 2025.8.1

Company overview

- Established: in 1988
- Headquarter: Osaka, Japan
- CEO & Representative: Toshihide Okamoto
- **EU-D Co., Ltd.** specializes in healthcare products, with a focus on supplements for women. Our mission is to promote health and wellness worldwide.

<https://www.eu-d.co.jp/>

Made in Japan quality and reliability ... Medical-grade dietary supplement ...

Eu-D Corporation will celebrate its 40th anniversary in 2028.

We have been expanding our business widely and for a long time, with Japanese medical institutions as our main customers.

Twenty years ago, the importance of dietary supplement in the medical industry began to be recognized in Japan.

In response, we released the first domestically produced multivitamin specifically for pregnant women.
(The manufacturing facility complies with GMP standards and maintains strict quality control in accordance with Japanese pharmaceutical and medical device laws.)

Since then, our dietary supplement for specialized infertility treatment facilities, plastic surgery clinics, dermatology clinics, and gynecology clinics have been featured in various medical conferences, and we have continued to progress steadily without compromise.

As dietary supplement available exclusively through Japanese medical institutions, we have responded to numerous requests from patients and doctors, developing and selling a lineup centered on women's needs in collaboration with medical institutions nationwide.

We have also received increasing inquiries from the overseas medical industry and will now expand our overseas operations significantly.

Quality and trust in Made in Japan... please consider our medical-grade dietary supplement.

(Our dietary supplement are available through medical institutions but are not pharmaceuticals.)

CV-Base Premium

Building your body is important for pregnancy.

Multivitamins and minerals, lactic acid bacteria, vegetable and fruit extracts, and more!

240tablets (8tablets/day)

It is necessary to supplement with supplements because it is difficult to eat a balanced diet every day. These supplements are not just rich in vitamins and minerals, but also in vegetable and fruit extracts. Taking base supplements will build the foundation of your body.
Balance your nutrition in preparation for pregnancy and childbirth.

◆**Commitment to raw materials**

We use materials that are as close to natural as possible, and use minimal manufacturing solvents.

Because of this, each product has its own unique color and smell.

◆**Manufactured in a GMP-certified**

Made in JAPAN - Manufactured in a safe and secure factory.

◆**Rich in nutrients**

It contains vitamins and minerals, coenzymes such as coenzyme Q10 and carnitine, 5.3 billion lactic acid bacteria, vegetable and fruit extracts, and enzymes.

<Contact information>

EU-D CORPORATION

〒541-0053 JPS Honmachi Building 4F, 2-3-9 Honmachi, Chuo-ku, Osaka

CV-Base Premium Product features

◆Vitamin minerals

It is rich in nutrients necessary for pregnancy, such as 400 µg of folic acid, 10 mg of zinc, 14 µg of vitamin D, and 90 mg of vitamin E.

◆Rich in B vitamins

It is rich in B vitamins, which are essential for moving the body. It is involved in energy metabolism and promotes fatigue recovery. It is a supplement that you can drink and feel the effects.

◆Contains enzymes

Contains fermented grain extract with a focus on digestion and absorption. Even if you take in the nutrients your body needs, if digestion is not smooth, absorption will not be smooth either.

◆Increase metabolism

We have also added coenzymes such as carnitine, alpha-lipoic acid, and coenzyme Q10, which are essential for the body to burn fat.

◆Vitamin A is supplemented with beta-carotene, which does not require worry of overdosing.

◆Contains 2.6 billion lactic acid bacteria

Contains 5.3 billion lactic acid bacteria of 22 different types, mainly Lactobacillus, which are necessary for improving the intestinal environment.

A new supplement that focuses on the intestinal environment.

◆Rich in vegetable and fruit extracts

Orange, pineapple, banana, apple, papaya, guava, melon, avocado, acerola, dried prune, lemon, pear, raisin, mango, watermelon, star fruit, kiwi fruit, camu camu, acai, shiitake mushroom, pumpkin, sweet potato, tomato, Carrots, mandioca, bell peppers, red turnips, yacon, radishes, cabbage, burdock, Kobe manteiga, chicory, pfaffia, rosemary, catuaba, purple sweet potato, cat's claw, cottonseed, cinnamon, lemongrass, carqueja, sugina, chapeu de couro, agaricus, anise, mate, stevia, fennel, ginger, etc.

Premium Pregnancy

Commitment to the product

- Contains plant fermentation enzymes with a focus on digestion and absorption
- Contains yeast folic acid
- Uses HPMC, the only non-carcinogenic substance
- Made in Japan

<Contact information>

EU-D CORPORATION

〒541-0053 JPS Honmachi Building 4F, 2-3-9 Honmachi, Chuo-ku, Osaka

Pregnancy Product Features

◆Commitment to raw materials

We use ingredients that are as close to natural as possible, and use the minimum amount of manufacturing chemicals. Because of this, each product has its own unique color and smell.

◆Contains enzymes

It contains fermented grain extract with a focus on digestion and absorption. Even if you take in the nutrients your body needs, if digestion is not done smoothly, they will not be absorbed smoothly.

◆Uses yeast folic acid

The commonly used raw material is "synthetic folic acid." This has the risk of remaining in the body as an isomer, so we use yeast folic acid, which has no residual risk. Check the ingredients label and be careful of anything labeled "folic acid."

◆Vitamin A is supplemented with beta-carotene, which does not require worry of overdosing.

◆Contains 26mg of iron

Many women are iron deficient. During pregnancy, your body's consumption of iron, a component of hemoglobin, increases in order to provide nutrients to your baby.

◆Contains 25μg (1000IU) of Vitamin D

Excessive UV protection measures can lead to a lack of Vitamin D. Vitamin D is effective in building strong bones and boosting immunity in babies.

◆Capsules are made from plant-derived HPMC.

Use ingredients as close to natural as possible

◆Manufactured in a GMP-certified factory

Made in JAPAN

R&F for men

Aglycone type isoflavones	30m g
L-Carnitine	1000m g
Zinc	10m g
VitaminC	150m g

There are still very few supplements on the market for male infertility. Aglycone-type isoflavones, zinc, carnitine, and vitamin C support male reproductive function. Aglycone-type isoflavones have been shown to improve sperm motile concentration and oxidative stress. Zinc and carnitine are also essential for improving reproductive function.

◆Aglycone type isoflavones

Improves sperm motile concentration and oxidative stress

◆L-Carnitine

It is expected that it will help activate mitochondria, support the development of high-quality sperm, and protect cells from attacks by reactive oxygen species.

◆Zinc

It activates enzyme reactions in the body, synthesizes DNA, and is essential for supporting reproductive ability. It also regulates hormone balance.

◆VitaminC

It acts as an antioxidant, protecting cells from attacks by active oxygen and other substances, keeping them youthful.

○Manufactured in a GMP certified factory

○This product is sold exclusively to medical institutions.

クリスパタス菌入り

Information

To balance the vaginal and uterine flora...

Contains 23 types of lactic acid bacteria
and lactoferrin

Contains additional *crispatus* bacteria

We've added *Lactobacillus crispatus*, a type of lactic acid bacteria that is abundant in women's bodies.

It helps protect the body from infections.

We are gradually coming to understand that the bacteria in the vagina and uterus originate from the intestinal tract.

Orally ingested lactoferrin and lactic acid bacteria including *Lactobacillus* improve intestinal flora.

As a result, it is believed to improve the bacterial environment in the vagina and uterus

<< Lactic acid bacteria: 23 types + Contains 320mg of lactoferrin per 2 capsules >>

2 capsules per day
(60 capsules/monthly supply)

※ Contains milk ingredients

<Contact information>

EU-D CORPORATION

〒541-0053 JPS Honmachi Building 4F, 2-3-9 Honmachi, Chuo-ku, Osaka

Types of Lactic Acid Bacteria

【Lactobacillus 15 types】

Lactobacillus crispatus
 Lactobacillus Acidophilus
 Lactobacillus Bubneli
 Lactobacillus Kazei
 Lactobacillus Delbrycky Bulgarcus
 Lactobacillus Delbrick Ractis
 Lactobacillus Fermentum
 Lactobacillus Gazelli
 Lactobacillus johnsonii
 Lactobacillus Paracasei
 Lactobacillus plantum
 Lactobacillus Reuteri
 Lactobacillus rhamnosus
 Lactobacillus Salivarius
 Lactobacillus Helveticus

【lactic acid bacteria 3 types】

Lactococcus cremoris
 Lactococcus Ractis
 Streptococcus thermophilus

【Bifidobacteria 5 types】

Bifidobacterium Ractis
 Bifidobacterium bifidum
 Bifidobacterium breve
 Bifidobacterium infantis
 Bifidobacterium longum

【Lactobacillus】

Lactic acid bacteria abundant in the vagina
 Prevents the growth of anaerobic and facultative anaerobic bacteria and maintains the homeostasis of healthy vaginal flora.
 Lactobacillus functions in the competition for nutrients with other bacteria, lowering vaginal pH, regulating the immune system, and producing bioactive compounds.

【Lactoferrin】

One of the iron-binding proteins, it is found in large amounts in breast milk and plays an important role in protecting newborns with weak immune systems from pathogens.

It acts as an immunomodulator and may provide an immune barrier when the vaginal flora is disturbed, such as when there is a decrease in vaginal Lactobacillus and an increase in anaerobic bacteria.

【How to take】

It is most effective when taken after meals (before going to bed).

We use "acid-resistant capsules" that do not dissolve in acid.

Fem Support

During menopause, a variety of symptoms appear due to a sudden drop in female hormones. For example, a decrease in estrogen leads to decreased bone density and increased risk of osteoporosis.

Supplement suggestions

per 2 tablets

• Contains 20mg of aglycone-type isoflavone

Ingredients with estrogen-like effects, hormonal balance adjustment, menopausal symptoms improvement, etc.

• Contains GABA 50mg

An amino acid that supports the function of the parasympathetic nervous system, improves blood flow and has a relaxing effect.

• Contains 25µg of Vitamin D

Prevents osteoporosis and boosts immunity

• Contains 10mg of Vitamin B6

Activates female hormones, regulates hormone balance by participating in estrogen metabolism, and improves PMS

• Contains 15µg of Vitamin B12

Stabilizes the autonomic nervous system and is involved in the synthesis of neurotransmitters in the brain.

• Contains 50mg of Vitamin E

Antioxidant, prevents hot flashes

• Contains 30mg of calcium

A component that is the raw material for bones, works well with vitamin D to increase bone density

※ Contains soy and dairy-derived ingredients

◆ 60 tablets (2 tablets per day) ◆

- ◆ Use the minimum amount of manufacturing chemicals necessary
- ◆ Manufactured in a GMP certified factory

PQQ + L-Carnitine

What is PQQ?

It is a water-soluble quinone compound, and was reported in the journal Nature as possibly being the 14th new vitamin, attracting worldwide attention.

It is a component found in vegetables and fermented foods, and is attracting attention as a food ingredient that invigorates cells.

It has effects such as promoting mitochondrial production and acting as an antioxidant. Since the human body cannot synthesize PQQ, it must be ingested through food.

It comes in an easy to drink stick type.

★PQQ22mg

It is said that it is necessary to take more than 20 mg of PQQ.

It has effects such as promoting mitochondrial production and acting as an antioxidant.

Its powerful antioxidant properties protect the body from oxidative stress.

By increasing mitochondrial activity, it is effective in preparing the body for pregnancy.

★L-Carnitine 500mg

It delivers free fatty acids to mitochondria and is essential for producing energy.

It is expected to have various effects, such as improving egg quality and increasing sperm motility.

〒541-0053 JPS Honmachi Building 4F, 2-3-9 Honmachi, Chuo-ku, Osaka

L-Arginine 3000mg

Now easier to drink, with a renewed lemon flavor!

30 packets (1 packet/day)

<How to take>

Please drink with water.

※Although it uses a high concentration of arginine, it is neutralized with citric acid so as not to put a strain on the body, so you can rest assured.

The powder may harden due to its hygroscopic properties, but this does not affect the quality.
Kneading the bag before opening will make it easier to dissolve.

Arginine can be synthesized in the body, but the production capacity is insufficient and the amount synthesized decreases due to stress or injury, so it is necessary to ingest the deficiency.

Nitric oxide (NO) produced from arginine dilates blood vessels and promotes blood flow.

It is involved in various functions within the body, such as improving reproductive function, promoting the secretion of growth hormone, improving immune function, and promoting fat metabolism.

①Contains 3,000mg of L-arginine per packet

②The lemon flavor makes it delicious and easy to drink.

③Manufactured in a GMP certified factory

■ Improves reproductive function ■

Thickening the uterine lining	Increased sperm count and motility	Prevention of pregnancy-induced hypertension
Improve blood flow	ED improving effect	Fatigue recovery

L-Carnitine

30 packets (1 packet per day)

Can be dissolved in water or taken as is !
Portable stick type !

◆L-carnitine is essential for mitochondrial function.◆

- Improve egg quality
- Improve sperm motility
- Diet effect by burning fat
- Fatigue recovery

◆Rapid digestion and absorption◆

- It has an immediate effect on digestion in the stomach.
 - The fact that it is digested quickly means that it is easily absorbed by the body.
- ※ Capsule and tablet types require time to dissolve in the stomach.
Depending on the ingredients, tablets or capsules may be used to slow down digestion.

◆Each packet contains 1,100mg of L-carnitine◆

- Since no solidifying solvents are used, the concentration of ingredients in each packet is high
- ※ Many tablet and capsule type supplements use manufacturing agents to solidify them.

◆Made in Japan

◆Manufactured in a GMP certified factory

<Contact information>

EU-D CORPORATION

〒541-0053 JPS Honmachi Building 4F, 2-3-9 Honmachi, Chuo-ku, Osaka

Heme Iron

◆Contains 10mg of heme iron and 50mg of vitamin C in 2 tablets

Iron is a mineral that is found in large amounts in hemoglobin in red blood cells. It is said that about half of Japanese women are deficient in iron. Iron is lost during menstruation, especially as blood loss is heavy, making women more susceptible to iron deficiency anemia. Iron is also necessary for the development of the baby during pregnancy and childbirth, so it is one of the nutrients that you should actively incorporate into your diet while trying to conceive.

・Contains 10mg of heme iron

Heme iron, found in animal sources such as meat and fish, is more easily absorbed and less likely to cause gastrointestinal disorders than non-heme iron, found in plant sources such as vegetables.

The amount absorbed is regulated by heme oxygenase, so it is unlikely to cause an overdose.

・Contains Vitamin C

By taking vitamin C at the same time, you can expect increased absorption.

- ◆Use the minimum amount of manufacturing chemicals necessary
- ◆Manufactured domestically in a GMP certified factory

◆60 capsules (2 capsules/day)

【How to take it】

Heme iron is absorbed intact, so it is most effective when taken on an empty stomach.

EU-D CORPORATION

〒541-0053 JPS Honmachi Building 4F, 2-3-9 Honmachi, Chuo-ku, Osaka

Premium Folic Acid+

◆ 90tablets (1tablet/day)
3 months worth

※Contains wheat as part of the ingredients

◆One tablet contains 400µg of yeast folic acid, 25µg of vitamin D, vitamins B6 and B12, and enzymes

・Vitamin D is an essential nutrient for those hoping to become pregnant, as well as for mothers and children. It is closely related to infertility, and also works to improve immunity and strengthen bones and teeth.

・Vitamin B6 and Vitamin B12 are nutrients necessary during pregnancy.
Vitamin B6: Prevents morning sickness, etc.
Vitamin B12: Prevents anemia, etc.

・Contains enzymes

Contains plant fermented enzymes to increase absorption rate without putting a burden on digestion. Even if you take in the nutrients your body needs, if digestion is not smooth, they will not be absorbed smoothly. By taking enzymes together, this supplement focuses on absorption rate.

- ・Use the minimum amount of manufacturing chemicals necessary
- ・Manufactured domestically in a GMP-certified factory

Zinc Information

◆A type of mineral involved in the formation of many enzymes and various biological functions

90 capsules
(1 capsule/day) for 3 months

◆The role of zinc ◆

It is a nutrient necessary for the growth and maintenance of the body, as it acts on the composition of enzymes in the body, activation of enzymatic reactions, regulation of hormone synthesis and secretion, DNA synthesis, protein synthesis, and immune response. It has been found that cell division, which is promoted by zinc deficiency, results in many errors in DNA transcription. The results of the National Health and Nutrition Survey revealed that both men and women suffer from zinc deficiency.

★For both men and women

It is essential for protein synthesis, promotes metabolism, and creates beautiful skin and hair.

Enhances the function of follicle-stimulating hormone and luteinizing hormone, supporting the body's preparation for pregnancy.

It is essential for sperm production and cell division.

This nutrient is necessary during pregnancy as it is expected to prevent fetal growth retardation.

◆One tablet provides 30 mg of Zinc

Our strengths

- **Made in Japan:** Offering high-quality products from a country known for longevity
- **GMP Certified Factory:** Ensuring strict quality management standards
- **DDS Brand:** A trusted brand among medical professionals
- **Scientific Evidence & Up-to-Date Knowledge:** Continuously incorporating the latest research and insights
- **After-Sales Service:** Providing full support and ongoing assistance

We sincerely look forward to your collaboration!

Thank you for your kind attention!
